ACCESSORIES COLLECTION

BKA presents the **Fall/Winter 2023** accessories collection that takes you into the space of the unexpected with newly designed shapes, details and three-dimensional knitting effects.

BKA offers products that are functional, durable and authentic, a collection that combines a romantic and an elegant soul but it is also made for everyday urban challenges.

Our **B-Recycle** beanie is made from consumer waste, such as PET plastic bottles that are usually incinerated or buried in the ground after use. This recycling process can reduce carbon dioxide emissions and gradually eliminate the demand for new raw materials.

Compared with the traditional polyester yarn, the regenerated polyester yarn has **high quality**, unique appearance, longer service life, **excellent functional performance**, and especially less impact on the environment.

The **Global Recycled Standard (GRS)** is promoted by Textile Exchange, which recognizes the importance of recycling for a sustainable production and consumption; it also aims to encourage the reduction of resources consumption (virgin raw materials, water and energy) and to increase the quality of recycled products.
